DETAILED ACTION

Claim Objections

1. Claim 37 is objected to because of the following informalities:

Claim 37 refers to “the sensor” in both lines 3 and 4 of the body of the claim. However, both a “non-vibrating contact potential difference sensor” and a “height sensor” have been claimed. Therefore it is unclear which sensor “the sensor” refers to. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 37 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: the relationships between the height sensor and the rest of the system. Assuming the aforementioned “the sensor” refers to the non-vibrating contact potential difference sensor, there is no functionality attributed to the height sensor and therefore its function is not clear.

Allowable Subject Matter

3. Claims 1-32, 34-36 and 45 are allowed.

Please see previous office actions and applicant’s responses for reasons for allowance.

Art Unit: 2863

4. Claim 37 would be allowable if rewritten to overcome the 35 U.S.C. 112, second paragraph rejection.

Please see previous office actions and applicant's responses for reasons for allowance.

5. Claims 38-44 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
